

San Joaquin Delta College Diesel Equipment Technology Presents Heavy Duty Vehicle Inspection Program / Periodic Smoke Inspection Program & Smoke-testing for Cargo Handling Equipment

This is a one-day course Smoke Testers, fleet managers and owners, and other covering current emissions regulations as they apply to on-road vehicles and cargo handling equipment. It includes hands-on training on the correct administration of the SAE J1667 Snap Acceleration Smoke Test Procedures for Heavy-Duty Diesel Powered Vehicles and for Cargo Handling Equipment used at ports and intermodal railyards.

This is the content of CCDET I and CCDET III offered on the same day for a discounted price compared to taking the two individual courses (\$250 vs \$300 (\$175 + \$125)). Participants take two separate certification tests and, upon passing, receive certificates for both CCDET I and CCDET III.

This course is highly recommended for Smoke Testers for Hire because you would be prepared to perform smoke tests for clients whether their fleet is on-road, includes cargo handling equipment, or both.
